Cover Letter

I am a Junior year student at Berklee College of Music pursuing a Bachelor of Arts in Songwriting and Music Production.

I am highly proficient with ProTools and experienced in audio editing, mixing and sound design. I have worked on several student projects throughout my coursework. In particular, I found game audio to be one of my greatest strengths and developed passion for it. In addition, I can write and produce music for a variety of genres and use cases.

My other competencies include video editing, graphic design and photography, having graduated with a diploma in Communications & Media Management from Temasek Polytechnic.

I have been playing Blizzard games since I was very young with Warcraft 3. I also played Diablo 3, Starcraft 2, Hearthstone and HOTS early in their releases. Similarly, I have played Overwatch since it was released and it had quickly become my favorite Blizzard franchise. It would be my greatest pleasure to have the opportunity to work and learn at Blizzard on new Overwatch content. Having also spent much time playing other games in the FPS genre, namely CSGO, Valorant and Apex Legends, I believe my understanding of the technical demands in the genre as a consumer would be useful fitting in this role.

Thank you for considering my application!
